PROFILE

Pre-Final year Computer Science student, with strong skills in Java and object-oriented programming. Possess hands-on experience in frontend development and familiar with low-level design principles. Experienced in working on collaborative team projects, quickly adaptable, and eager to learn and contribute to solving real-world problems while continuously expanding my skill set.

EDUCATION

Vellore Institute of Technology — **2023 – Present**
Bachelor of Technology-Computer Science and Engineering–CGPA: 9.18 — *Amaravati*

Rajiv Gandhi University of Knowledge Technologies — **2021 – 2023**
Pre University Course–MPC—CGPA: 9.99 — *Kadapa*

Montessori Indus EM School — **Completed in 2021**
Secondary Education–CBSE–Percentage: 96.3% — *Kurnool*

TECHNICAL SKILLS

- **Languages:** Java, Python (Intermediate), JavaScript, SQL
- **Developer Tools:** VS Code, Git, Jupyter Notebook
- **AI & Automation:** LLM Integration, Prompt Engineering, Workflow Automation using Make.com
- **Soft Skills:** Problem Solving, Effective Communication, Adaptability
- Software Engineering, Computer Networks, Data Structures, Algorithms Analysis, Database Management, Operating Systems, Artificial Intelligence, Machine Learning

PROJECTS

Online Payment Fraud Detection

- Cleaned and preprocessed real-world payment datasets using Pandas and NumPy to prepare high-quality training data
- Implemented ML models including Logistic Regression and Random Forest to detect fraudulent transactions
- Achieved 96% precision in fraud identification and validated performance using confusion matrix and ROC curve
- Visualized feature importances and fraud patterns with Matplotlib to improve model interpretability

AgriDirect Farm-to-Table E-Commerce Platform

- Developed a responsive frontend e-commerce platform connecting farmers directly with consumers using HTML, CSS, and JavaScript
- Implemented dynamic add-to-cart functionality with real-time cart calculation using JavaScript
- Designed product listing pages with structured UI components and optimized layout for cross-device compatibility
- Built a clean, agriculture-inspired user interface and deployed the application using GitHub Pages

CERTIFICATIONS

- Full Stack Development – Infosys Springboard
- Generative AI – Microsoft and LinkedIn Learning
- Machine Learning – Smart Bridge and Google for Developers
- JavaScript, SQL – CCBP 4.0 Academy, NxtWave

ACHIEVEMENTS

Pragathi Infosys Cohort 4

Selected in recognition of demonstrated technical aptitude, strong problem-solving skills, and successful project execution

Walmart Sparkplug 2026

Advanced to the final round for one of the top 100 students nationwide in a rigorous coding and core conceptual assessment
